

## Environmental Policy

C C Contracting Ltd. specialises in the groundworks element of construction for industry and commerce, ranging from warehouse floors to complex machine foundations, and including related construction work, such as drainage and car park construction.

We are committed to continuously seeking to improve our environmental performance and will comply with the requirements of environmental legislation and approved codes of practice.

Each project shall be subject to individual appraisal of environmental controls, particularly in respect of noise levels and dust generation to ensure the minimum disturbance and disruption is caused. Contractors shall be advised of the minimum requirements in the Construction Phase Health and Safety Plan and sites will be kept clean and tidy as far as is reasonably practicable.

Our employees will be educated and trained in environmental issues and we will ensure they have a good understanding of the environmental impacts of our business and how to help reduce these effects.

Wherever possible pollution and emissions will be reduced and efficient use of natural resources will be made by minimising waste, conserving energy, water and other resources. Endeavours to use alternative, more environmentally sound materials will be made, providing that these are acceptable to our Clients and of suitable quality and economic to use.

This policy will be made available to employees and other interested parties including suppliers, subcontractors, customers, regulators, shareholders and the public to encourage similar environmental standards. It will be reviewed regularly, and objectives and targets based on review findings will be set in order to make improvements wherever necessary.
