

## **Asbestos Policy Statement** v2.0

Where a client's survey, asbestos plan or register are not available, C. C. Contracting will undertake a pre-demolition survey of any building that requires demolition as part of our larger contracted works. This survey is to be carried out by a trained and competent person. If any asbestos is found, the relevant enforcing authority is to be notified and the asbestos dealt with as per the Control of Asbestos Regulations 2012.

C. C. Contracting are a civil engineering contractor, whereby our main work stream is groundworks. During any excavation, if suspect material is exposed, all works in that area are suspended and a trained and competent person inspects the material and a sample will be sent off for testing if required. If contaminated, then the relevant enforcing authority is informed, and it is removed/disposed of as per Control of Asbestos Regulations 2012.

This policy will be made available to employees, suppliers, subcontractors and other interested parties. It will be reviewed regularly, and objectives and targets based on review findings will be set in order to make improvements wherever necessary.

Signed:

Peter Child
